# Transportation is Key

**Education**

**Child Care**

**Professional  
Development**

**Healthy Food**

## Transportation Access Solutions

- Public transportation
- Shared mobility services (carshare)
- Micromobility (bikes, scooters)

### Current carshare models

- Mostly exist in urban, affluent areas
- Electric vehicles (EVs) have not been prioritized in carshare fleets
- Rural areas and low-income communities left out

### Proposed improvements

- Add EVs to carshare programs
- Broaden transportation sector
- Increase mobility options and affordability in rural areas and low-income communities
