Subnational governments are leading in EV ambition but often lack access to technical support, policy recommendations, or capital. By creating shared and scalable resources, the Electrification Coalition (EC) helps cities/states reduce barriers, connect with peers, and achieve higher ambitions. Through collaborative cohorts, we ensure nimble and fast-acting commitments and outcomes, ultimately **accelerating transportation electrification**.

Key Takeaways

- Created low-cost access to customized technical resources
- Increased access to capital via public-private partnerships
- Peer exchange opportunities increased scale, speed, and shared lessons learned

Partners

States: Michigan, Pennsylvania, North Carolina, Nevada, Virginia.
Cities: Saint Paul, Minnesota; Orlando, Florida; Philadelphia, Pennsylvania.

Results

- EV car-sharing programs
- Policy bootcamps
- Public-private partnerships
- Increased market demand
- Replicated key policies

“We are proud to be a part of the impactful collaborative work that local governments are leading...” said **Orlando Mayor Buddy Dyer**.

EC Cohort Support Model

Technical Tools and Resources

Shared Learning

Individual Support

The EC drives the policies and actions that will electrify all modes of transportation to reduce oil dependence and protect economic and national security, public health, and American jobs.

“Cross sector engagement and collaboration enhances our efforts to provide innovative and equitable programs.” said **Saint Paul Mayor Melvin Carter**.
